

the  
Minnehaha Creek  
Watershed District  
presents

in cooperation with

**TonkaBlue**

Hey, looking slick Don. Is that a new do?  
Nah, I got it from a guy that looks a whole  
lot like you.

Gas up properly and watch out for spills  
Fuel keeps us going, but goodness fulfills.

### **Watch what you spill.**

Oil and gasoline spills have lasting effects on our local ecology. Rough waters and short nozzles make refueling on the lake difficult. Use smaller tanks (1-2 gal.) to reduce spills and always bring a rag to wipe away any runoff, even at home.

**Stop.**

and think about your water
